

PROJECT MEETING MINUTES

Meeting Details

Project: Network Monitoring Platform

Date: 8 September 2026

Attendees: Engineering Team, Product Team, Security Team

Discussion

The team reviewed dashboard requirements, alert thresholds, deployment progress, and documentation requirements.

Decisions

The dashboard will display service health, recent alerts, and performance trends. The security team will review access controls before deployment.

Action Items

Engineering will complete the dashboard prototype. Product will review the user interface. Security will conduct an access-control review.
